POSITION: Assistant Professor of Research in Epidemiology

Collaborates with public health officials and biomedical researchers in the evaluation of public health programs; designing research; preparing research and program funding proposals; developing research instruments and surveys; collecting, managing, and analyzing data; interpreting results; preparing reports for health agencies and the lay public; and publishing and disseminating findings. Methods may include qualitative and quantitative approaches.

SETTING: Department of Biostatistics and Epidemiology, one of four departments within the nationally-accredited Hudson College of Public Health, University of Oklahoma Health Sciences Center, Oklahoma City, Oklahoma

RANK: Assistant Professor of Research

SALARY: Salary is negotiable and will be based on experience and credentials. Initial appointment and funding are guaranteed for 3 years. Continuation of the appointment is subject to annual review.

RESPONSIBILITIES:

Responsibilities within the Department of Biostatistics and Epidemiology include:
1. **Program Evaluation and Research Study Design.** Collaborating with public health officials and biomedical researchers in designing and implementing program evaluations and research studies. Designs may be mixed, including quantitative and qualitative.
2. **Proposal Development.** Developing and writing funding proposals in partnership with agencies, and preparing investigator-initiated proposals.
3. **Instrument Development.** Developing research instruments, surveys and questionnaires.
4. **Data Collection.** Overseeing the collection and management of data.
5. **Data Analysis.** Analyzing data and assisting in the interpretation of results, including the use of mixed methods.
6. **Report Preparation.** Preparing reports for health agencies and the lay public, writing manuscripts, and assisting in the publication and dissemination of research and findings.
7. **Teaching.** Teaching graduate-level courses in epidemiology, directing and advising graduate students, and working with other faculty in developing and maintaining interdisciplinary graduate programs through planning, team teaching, and cooperative research.
8. **Service.** Participating in faculty governance and oversight through committee membership in the Department, College and University. Engaging in service to the public and to professional associations.

REQUIRED QUALIFICATIONS:

- **Education:** Ph.D. in Epidemiology or related field such as, but not limited to, psychology, sociology, anthropology
- **Experience:** 12 months collaborative research experience in public health or biomedical sciences to have been gained during education, training, or post-training work

PREFERRED: Prior experience in public health program evaluation or research project management

APPLICATIONS: Individuals interested in applying should send a letter outlining their public health and research interests, teaching interests, current curriculum vitae, a preferred address for confidential correspondence, and the names and contact information of three references to Dr. Laura Beebe (laura-beebe@ouhsc.edu). Review of candidates will begin immediately. Applications will be accepted until the position is filled.
