

## 2. Required Courses

The student must earn at least 30 credit hours in coursework at the University of Oklahoma after admission to the PhD program. The student is required to take the following courses as either a PhD student or in completing the MS or MPH degree:

### Graduate College

BSE 5111 Scientific Integrity in Research 1 credit hour

### BSE Required Courses

General /Epidemiology Courses 9 credit hours

BSE 5153 Clinical Trials

BSE 6192 Grant Writing

BSE 6194 Advanced Epidemiologic Methods

### Theory Courses

During the first year of doctoral coursework 6 credit hours

BSE 5703 Principles of the Theory of Probability

BSE 5733 Principles of Mathematical Statistics I

Following the first year of doctoral coursework 6 credit hours

BSE 5743 Principles of Mathematical Statistics II

BSE 6553 Linear Models

### Applied Biostatistics

BSE 5653 Non-Parametric Methods

BSE 6563 Longitudinal Data Analysis

BSE 6643 Survival Data Analysis

BSE 6663 Multivariate Biostatistics

3. Elective Courses: 3 credit hours minimum

The student must complete at least three additional credit hours of elective coursework in the department of biostatistics and epidemiology. This coursework must be approved in advance by the student's advisory committee. The following courses do not satisfy the requirement: BSE 5980, 6950, or 6980.

## 4. Dissertation

The student must enroll for at least 20 credit hours in BSE 6980 Research for Doctoral Dissertation. No more than 25 credit hours in BSE 6980 may be applied toward the minimum 90 credit hours required for the degree.

## 5. Other Requirements

- a. Students are required, prior to initiation of doctoral research, to complete training in Responsible Conduct of Research (RCR) and Protection of Human Research Subjects. The training includes completion of two sections of the CITI course (Protection of Human Research Subjects and Responsible Conduct of Research), attendance at the OUHSC IRB In-House Education Program, and successful completion of a one credit-hour course in RCR approved by the Department.
- b. Students are required to attend the departmental and college seminars during the spring and fall semesters.
- c. Students are required to enroll in a minimum of 6 credit hours during the spring and fall semesters.
- d. Students are required to achieve a working knowledge of methods, programming, and applications of computers as used in biostatistics and epidemiology. This knowledge may be acquired by formal class work or by experience acquired either before entering or during the course of the program. Completing BSE 5013 with a passing grade constitutes the minimum level of knowledge associated with this requirement.
- e. Students are required to achieve a general understanding of the biomedical sciences as they relate to human health and disease. This requirement may be satisfied in one or more areas. Any course work needed to satisfy this requirement may be taken at this or another institution, either before or after entering the program. One example of an applicable course is Principles of Pathobiology (PATH 6024).
- f. Tools of research that increase research proficiency are required. Research tools include competence in the use of computerized databases, and in the oral and written presentation of research data. The faculty will validate students' acquiring of tools of research as they assess students' performance on (1) the written qualifying examination, (2) the general and oral examinations, and (3) the dissertation.
- g. Students must pass a written qualifying examination at the end of the first year of doctoral coursework, which must include BSE 5703 and BSE 5733. The qualifying examination will consist of two parts, each roughly four credit hours long. One part will focus on knowledge of statistical theory and mathematical statistics, and the other will assess ability to process, analyze, and interpret data collected to answer a research question.
- h. Students must pass a General Written and Oral Examination

i. Students must complete the defense of the dissertation within five years of the end of the semester within which the General Written and Oral examination was successfully completed. If the time expires before the dissertation is completed, the coursework must be revalidated by retaking and passing the General Written and Oral Examination.

*This degree program is subject to the policies and procedures printed in the University of Oklahoma College of Public Health Bulletin.*
